

BESPOKE AI WORKFLOW ENGINEERING LTD.

Cross-Sector Agentic Impact Workshop

Find one automatable bottleneck in half a day

NOT A WEBINAR. A WORKING SESSION.

Eight leaders from **pharma, engineering, ops, and executive** roles sit in the same room. Each maps one real recurring task. Together you discover how the same patterns — inbox queues, validation bottlenecks, shadow AI — show up across industries.

You leave with a **Personal Automation Map** and a **two-week pilot scope**. No production access. No sensitive data required.

FORMAT

When	September–October 2026 (date confirmed after curation)
Where	Dublin city centre (hybrid)
Duration	3.5–4 hours + optional networking
In-person seats	8 (curated; max 2 per organisation)
Virtual observers	Up to 2 (framing, panel, Q&A only)
Investment	€49 early bird · €79 standard · €99 final seats

AGENDA

1. **Framing** (30 min) — Why vertical micro-agents beat horizontal co-pilots
2. **Bottleneck mapping** (60 min) — Silent worksheet + paired walk-through on your real task
3. **Cross-sector panel** (45 min) — Shared patterns in delays, failed automation, governance
4. **Scorecard + pilot scope** (45 min) — Green/Amber/Red qualification; draft two-week slice
5. **Close** (30 min) — Book complimentary scoping call; optional networking

WHO SHOULD APPLY

Regulated	QA, compliance, ops (pharma, medical, GDP)
Engineering	CTO, VP Eng, tech lead
Ops / finance	Analyst, controller
Executive	Division head, innovation director

Application required. We curate a balanced mix — first paid does not guarantee a seat.

WHY US

- **26 years** enterprise architecture — boardroom strategy plus hands-on execution
- **Vertical micro-agents**, not chat co-pilots — orchestrated pipelines with human validation

- **Proven patterns** — predictive quality (12–18 month regulatory lead time) · GDP compliance automation with zero-API intake
